Vari-Green Temperature/Humidity Control

The Indoor Air Quality Temperature / Humidity control monitors the temperature and/or the relative humidity in a space. It will automatically adjust the ventilation rate to or from a space by increasing or decreasing the speed of the fan based on the desired set point. Recommended for use in assisted living facilities, schools, prisons and buildings constructed of materials that are more sensitive to high moisture levels.

- Adjustments for set point, minimum and maximum fan speed
- Fan speed and temperature or humidity level are available as an analog output to read by a building automation system or secondary device.

Características de funcionamiento

No hay curva del ventilador disponible.

Características de Construcción

Includes
